### HP Enterprise Discloses Hack, Suspects Russian Group

TIME, JANUARY 25, 2024

(BOSTON) — Hewlett Packard Enterprise disclosed Wednesday that suspected state-backed Russian hackers broke into its cloud-based email system and stole data from cybersecurity and other employees.

5 The provider of information technology products and services said in a Securities and Exchange Commission regulatory filing that it was informed of the intrusion on Jan. 12. It said it believed the hackers were from Cozy Bear, a unit of Russia's SVR foreign intelligence service.

10 Microsoft reported last week that it also discovered an intrusion of its corporate network on Jan. 12. The tech giant said the breach began in late November and also blamed Cozy Bear. It said the Russian hackers accessed accounts of senior Microsoft executives as well as cybersecurity and legal employees.

15 Cozy Bear was behind the SolarWinds breach and focuses stealth intelligence-gathering on Western governments, IT service providers and think tanks in the U.S. and Europe.

“Based on our investigation, we now believe that the threat actor accessed and exfiltrated data beginning in May 2023 from a small percentage of HPE mailboxes belonging to individuals in our cybersecurity, go-to-market, business segments, and other functions,” HPE said in the filing.

20 Company spokesman Adam R. Bauer said the compromised email boxes were running Microsoft software.

25 Bauer said HPE is unable to say whether the breach of its network was related to the hack that Microsoft disclosed last week as “we do not have the details of the incident Microsoft disclosed.”

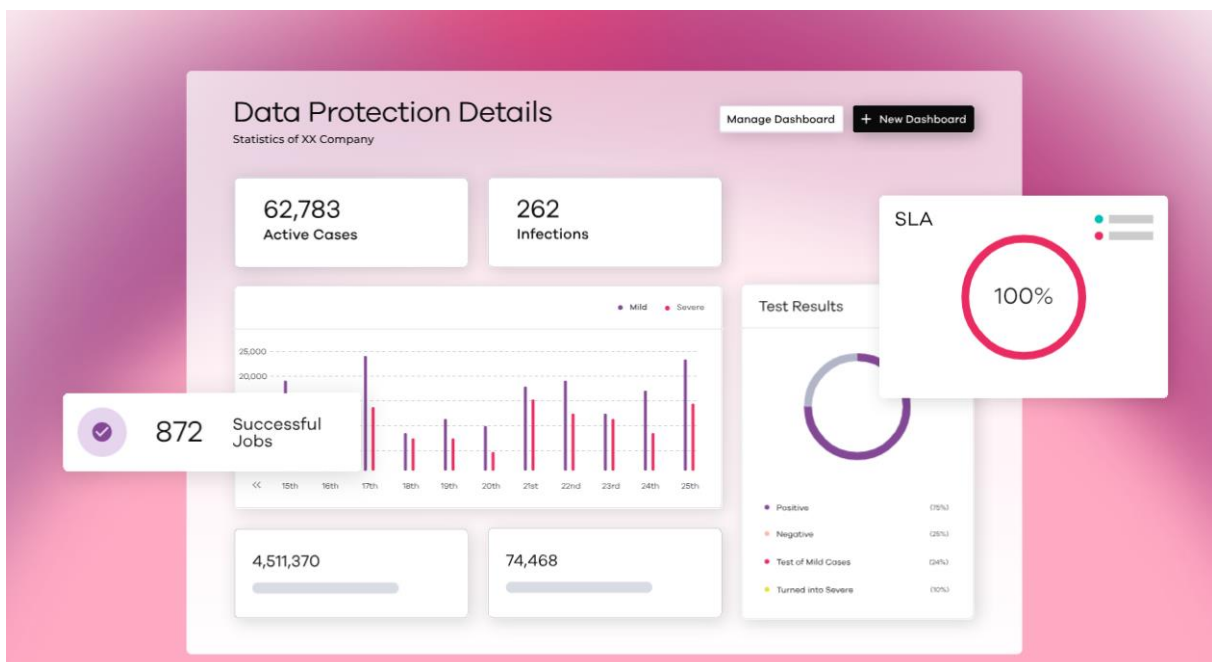

30 He did not specify the seniority of the HPE employees whose accounts were accessed by the hackers. “The total scope of mailboxes and emails accessed remains under investigation.” HPE said in the filing that it has so far determined that the hack has had no material impact on its operations or financial health. Both disclosures come a month after a new U.S. Securities and Exchange Commission rule took effect that compels publicly traded companies to disclose breaches that could negatively impact their business.

# Introducing Commvault® Cloud

Powered by Metallic® AI

Meet the cyber resilience platform built for the hybrid enterprise. Commvault Cloud delivers true cloud cyber resilience while ensuring the fastest recovery. It's the ultimate weapon against ransomware.

Enterprise-grade data security. Cloud simplicity and scale. The industry's lowest TCO.

With Commvault Cloud, you no longer have to choose between your budget and your data security. Protect more, recover faster and spend less.

## SITUATION :

**You are** a sales representative for the Commvault Cloud branch in the UK. You are meeting Brian Jones, Head of the Cyber Security Department at the headquarters of MG Motor Ltd, based in the City, London. Mr Jones tells you he intends to increase the group's protection systems against industrial espionage.

You try to convince him that the Commvault system is the safest and most appropriate for MG Motor : cost, high level of security, user-friendly for employees, etc.
